WEATHER SHIELD SERIES DOCK SEALS:

Weather Shield Series Dock Seal is an effective and efficient dock seal that meets budget requirements and industry standards. The fabric on the vertical side pads is wrapped and stapled construction. This design requires breather slits to release air pressure when trucks are making contact with the dock seal.

FEATURES & OPTIONS

HEAD PAD:

A 12" wide foam filled, wood backed head member is standard on Perma Dock Seals for doors less than 9'0" high. Extra wide head members, 18"- 30", are available to allow varied truck height coverage.

F-SERIES CURTAIN

The F-series head curtain is used when door sizes are 9' 0' and over. It extends over and down the face of the side pads to cover a wide range of truck heights and by adding Velcro slits with a rope pull-up system. the F-Series curtain becomes more adjustable.

Choice of three styles:

NF= No Foam, Most adjustable

EF= 1 inch of foam, Somewhat adjustable

F= 4 inches of foam, Least adjustable

WEDGED SIDE MEMBERS:

Wedge cut side members extend foam only into the door opening to effectively seal the trailer without subjecting wood backboards to damage from passing loads.

BACKBOARD:

All backboards are made with pressure treated lumber

GUIDE STRIPES:

Guide stripes are 4" wide and comes standard 24" high in 18 oz. safety yellow vinyl as shown in front photos.

OPTION: Full height guides stripes upon request

HIGH QUALITY FABRICS:

The dock seal cover fabric is the most critical component in determining the useful lift of the dock seal. Perma Tech offers a variety of weighted vinyl and colors designed to suite every dock situation from light volume traffic to the heaviest traffic.

OPTIONS:

DROP FLAP:

A weighted drop flap can be sewn to the foam head pad to service an occasional lower truck and can be held out of the way with Velcro fasteners.

PERMA PLEATS:

Perma Pleats provide extra protection on the face of the dock seal. Perma Pleats are available in a variety of fabrics and comes in 4", 8", and 16" face exposure.

PP4
EXPOSURE: 4"
OVERLAP: 4"
TOTAL LENGTH: 8"

PP8
EXPOSURE: 8"
OVERLAP: 4"
TOTAL LENGTH: 12"

PP16
EXPOSURE: 16"
OVERLAP: 2"
TOTAL LENGTH: 18"

WEAR FACE:

Wear face is a second layer of material sewn over the base fabric to provide additional protection to the face of the of the dock seal.

Wear Face

METAL HOOD:

Perma Metal Hoods can be used in a variety of ways, most common over dock seals to keep snow or moisture off the header on the loading dock.

DECLINE OR INCLINE

Tapered dock seal projections are available to accommodate sloped drives. Even truck contact and compression into the foam pads eliminate excessive wear at the top or bottom of the seal.

Our Commitment to Our Customers:

Perma Tech, grounded in superior craftsmanship and committed to the highest level of customer satisfaction, designs and manufactures high quality, innovative loading dock products for our business partners that improve safety, productivity, and energy savings.
