PERMA RIGID DOCK SHELTER

Perma Rigid Dock Shelters are designed to service a variety of truck sizes and types, regardless of dock door size or bumper projection. As trucks back into the shelter, face curtains wrap around truck sides and top for positive weather protection ensuring reduced energy costs, loading safety, and product protection. The full trailer opening remains accessible or unrestricted loading and unloading. Perma Tech offers a wide variety of dock shelter cover fabrics and unit sizes to custom build a dock shelter designed to meet your requirements. Years of experience result in the proven craftsmanship and quality construction, giving you the best value for your investment.

A rigid framework combined with a wide range of cover fabrics make Perma Rigid Frame Dock Shelter suitable for even the heaviest traffic application. All lumber frames are pressure treated, Scotch-ply fiberglass stays sewn into the face curtains plus a foam edge on both vertical side curtains maintain constant pressure against the truck for positive weather protection. Light transmitting panels on the top and side frames permit good visibility for safe loading. Perma Pleats on the head curtain and extra wear areas on the side curtains add durability at the critical truck contact points.

FEATURES AND OPTIONS

HEAD CURTAIN:

Choice of many heavy duty fabrics, all with fiberglass stays and Perma Pleat wear flaps on each end at truck contact points.

SIDE CURTAINS:

Same fabric as head curtain with fiberglass stays. Extra wear area on bottom of curtains at critical truck contact points.

HEAD FRAME:

2" x 6" Pressure treated lumber, peaked at center to prevent snow and water build-up, and covered with a translucent panel to allow a lighted loading area.

SIDE FRAME:

2" x 4" Pressure treated lumber covered with a translucent panel for a safe, lighted loading area. Steel Frames Available

FOAM EDGE:

Fabric covered foam strip on leading edge of side curtains for a snug fit against trailer sides.

GUIDE PATCH:

18oz Yellow guide patch 12" high placed 9ft. on center for accurate truck positioning.

BOTTOM DRAFT CUSHIONS:

Foam filled to seal off bottom of shelter. Independent of side curtains for easy and economical replacement. "NO STEP" printed on cushion for safety.

PROTECTIVE STEEL BUMPERS:

Factory painted steel channel bumpers to protect shelter frame.

STEEL BUMPER

DECLINE OR INCLINE:

Tapered dock shelter projections are available to accommodate declined or inclined approaches.
