

Rigid Dock Shelter

Perma Rigid Shelters are designed to service a variety of truck sizes and types, regardless of dock door size or bumper projection. As trucks back into the shelter, face curtains wrap around truck sides and top for positive weather protection, ensuring reduced energy costs, loading safety, and product protection. The full trailer opening remains accessible for unrestricted loading and unloading. And it can accommodate the newer 8'6" wide trailers!

Perma Tech offers a wide variety of dock shelter cover fabrics and unit sizes to custom build a dock shelter designed to meet your requirements. Years of experience result in time proven craftsmanship and quality construction, giving you the best value for your investment. **Our commitment to quality stands out in each and every detail and ultimately in the performance at your loading dock.**

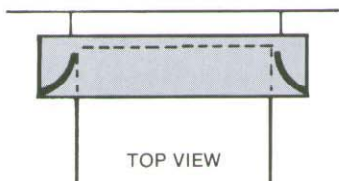

A rigid framework combined with a wide range of cover fabrics make Perma's Rigid Dock Shelter suitable for even the heaviest traffic application. All lumber frames are pressure treated, with a 30 year warranty against decay. Scotch-ply fiberglass stays sewn into the face curtains plus a foam edge on both vertical side curtains maintain constant pressure against the truck for positive weather protection. Light transmitting panels on the top and side frames permit good visibility for safe loading. Perma Pleats on the head curtain and extra wear areas on the side curtains add durability at the critical truck contact points. **Perma Tech combines all of these features to offer you a dock shelter that's built to last!**

Cover Fabrics

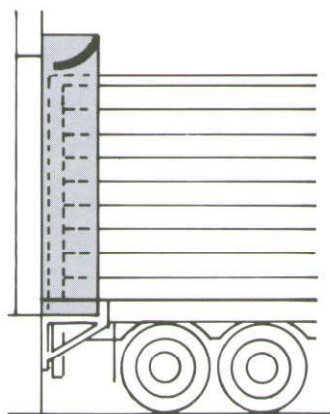

The face curtain material is the most critical component in determining the useful life of a dock shelter. Perma Tech uses only the **highest quality industrial fabrics** available, engineered and tested for abrasion resistance, tear resistance, weathering, and flexibility. Our full line of dock shelter models feature hypalon, vinyl, neoprene, and urethane, in various weights and colors designed to suit even the heaviest volume traffic. Our new **HIGH TEAR fabrics** are designed exclusively for the dock shelter industry and are able to hold up to the toughest conditions.

Standard Features

- **Head Curtain** — Choice of many heavy duty fabrics, all with fiberglass stays and Perma Pleat wear flaps on each side at truck contact areas.
- **Side Curtains** — Same fabric as head curtain with fiberglass stays. Wear strips 7" wide x full height along inside edge and extra wear area on bottom of curtains at critical truck contact areas.
- **Foam Edge** — Fabric covered foam strip on leading edge of side curtains for a snug fit against trailer sides.
- **Guide Stripe** — 18 oz. Yellow for accurate truck positioning.
- **Bottom Draft Cushions** — Foam filled to seal off bottom of shelter. Independent of side curtains for easy and economical replacement. "NO STEP" printed on cushion for safety.
- **Head Frame** — 2" x 6" Pressure treated lumber, peaked at center to prevent snow and water build-up, and covered with a translucent panel to allow a lighted loading area.
- **Side Frames** — 2" x 4" Pressure treated lumber covered with a translucent panel for a safe, lighted loading area.
- **Protective Steel Bumpers** — Factory painted steel channel bumpers to protect shelter frame.

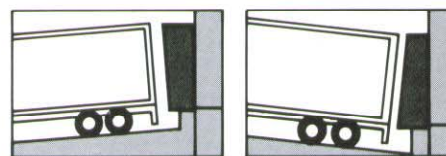

TOP VIEW

Face curtains on Perma's Rigid Dock Shelter wrap around the sides and top of a trailer to ensure reduced energy loss and positive weather protection.

Steel Bumpers

Tapered dock shelter projections are available to accommodate inclined or declined approaches.
