PERMA SOFT-SIDED SHELTER The Ultra Dark

Overlapping light darkening Perma Pleats

Perma Gap Hook

FEATURES & OPTIONS

The Ultra Dark Dock Shelter is the ultimate combination of a soft-sided shelter with rain dam as one unit. This shelter comes with light eliminating pleats on the head curtain and gap hooks for the side curtains. The Ultra Dark assist with FDA compliance for food and pharmaceutical industries by eliminating light while providing a tight consistent seal.

RAIN DAM HEADER:

Tubular steel and fiberglass construction with black fabric Perma Pleats that eliminates light transmission into the dock area. The Rain Dam effectively diverts rain off to the sides of the trailer and NOT on your DOCKS! Galvanized steel frame gussets support the head frame so the foam side frames can move independently with the trailers.

SIDE CURTAINS:

Side curtains are made from the same fabric as head curtain with fiberglass stiffeners sewn in. Extra wear areas on bottom of curtains at critical truck contact points. Side curtain can be easily replaced.

PERMA GAP HOOK:

Perma Gap Hooks on the side curtains reduce air infiltration around the trailer door hinge gaps that can be equal up to a 18" x 18" hole in the building wall at each dock!

YELLOW GUIDE PATCHES:

18 oz. yellow vinyl, that is 10 ft. on center so drivers can easily see them all the way back into the dock position.

BOTTOM DRAFT CUSHIONS:

Designed for an improved seal at the bottom of the shelter behind the side curtains. Independent of the side curtains for easy and economical replacement. Hi-Visibility "NO STEP" printed on draft cushions for dock operator safety.

SIDE FRAME:

Foam filled side frames, high density, full memory 55 lbs. foam with 2" x 6" or 8" wide pressure treated back boards.
Option: 16 gauge steel backing available.

DECLINE OR INCLINE:

Tapered dock shelter projections are available to accommodate inclined or declined approaches.
